## **RESEARCH STUDIES / MAJOR AUDITS**

My current research interest is mainly focused on UK National Quality Improvement Studies or Major Audits on topics related with General / Emergency Surgery such as:

- 1. The National Complicated Diverticulitis Study (CADS)**  
National Clinical Trial currently on its 3<sup>rd</sup> year focusing on patients who suffer from complicated diverticular disease. I am the Principal Investigator and Clinical Lead at Northwest London Hospitals NHS Trust.
- 2. National Acute Small Bowel Obstruction (NASBO) Clinical Trial**  
National Clinical Trial which started on January 2017 and is focusing on the quality improvement of the clinical outcome of patients who admitted in the hospital with acute small bowel obstruction.
- 3. National Emergency Laparotomy Audit (NELA)**  
It is the biggest National Audit running currently in the UK which is focuses in the improvement of the mortality and morbidity of patient who undergo emergency laparotomy. Study is already running for 4 years and has the participation of all major hospitals across the UK. I am the Surgical Lead of the Study across the Northwest London.
- 4. National Enhanced Peri – Operative Care for High risk patients (EPOCH) clinical trial**  
National Clinical Trial that focused on quality improvement of the perioperative period for high risk surgical patients. I am the Surgical Leader of Study for the hospitals based on West London.
- 5. National Sepsis Audit 2013**  
National Study focusing on quality improvement for patients suffer from Sepsis. I was Member of King’s College Hospital’s research team.

I am the leading Consultant in numerous local quality improvement studies and audits that are mainly undertaken from the surgical department of the Trust.

As member of the London Northwest Healthcare NHS Trust, we organised and published our research on:

1. Impact of a dedicated emergency surgical unit on early laparoscopic cholecystectomy for acute cholecystitis.
2. Implementation of a novel emergency surgical unit significantly improves the management of gallstone pancreatitis.

---

I was the principal surgical researcher of the Scott & White Memorial Hospital, Texas, USA, during 2011- 2012.

1. Study and publication of the benefits from Single Incision Laparoscopic Colorectal Surgery. Results were presented to American and European Scientific Meetings and were published on peer reviewed scientific journals.
